**2,6 mil EUR**

Volume:  
**built-up area 3.745 m<sup>2</sup>**  
**paved areas 4.295 m<sup>2</sup>**

### General delivery

The 5th phase of the construction of a new building facility for assembly of machinery and equipment for the production of packaging follows up the existing assembly and expedition hall. The hall is one-storey, double-glazed with a saddle roof and is made up of a steel structure based on the piles. The hall contains 3 floors of inbuild structure which occupies part of its internal area. Its external cladding is partly formed of hall external cladding and the roof forms its roof structure.
